Memorandum for: DDA

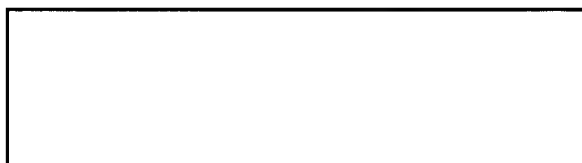

Subject : Smoking in Agency Buildings

Reference : Logistics Memo

STAT

1. I am a reformed smoker and applauded the smoking policies set forth in the referenced memo. I was disappointed, however, when today I noticed the allocation of space for non-smokers in the CIA headquarters library. The space allotted to smokers was much larger and more select than that for non-smokers.

2. I do not wish to argue the rights of the smoker vs. the non-smoker. The intent of the policy outlined in the referenced memo, however, was to separate the two groups on an equitable basis. This does not appear to have been effected in the present arrangement in the headquarters library.
